(In revision for REC)

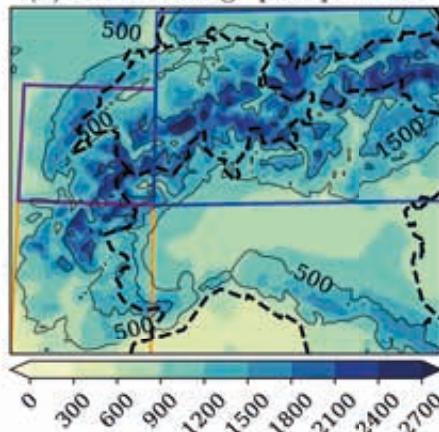

Precipitation

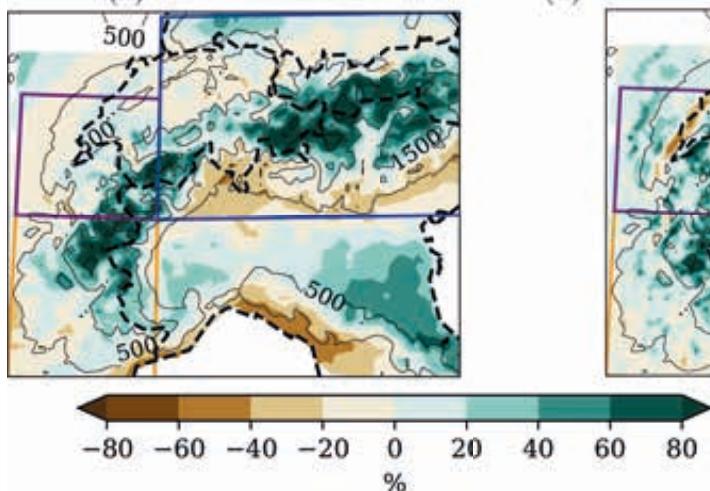

Annual mean of precipitation (a, mm)
over 1971-2008: MAR and differences
(%) with observational datasets

Precipitation

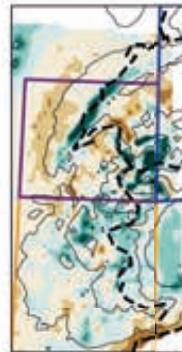

(a) MAR average precipitation

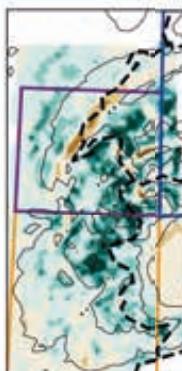

(b) MAR - EURO4M

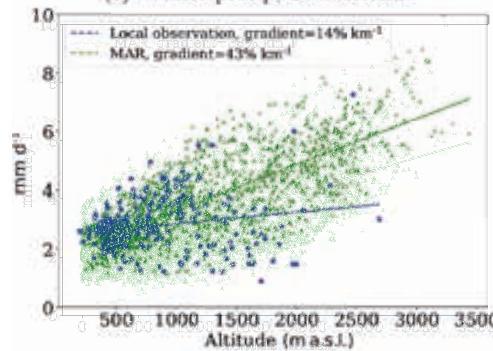

(c) MAR - SPAZM

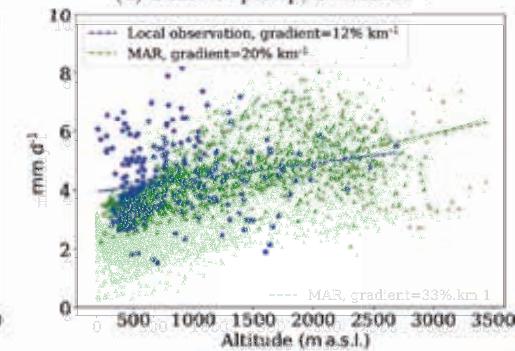

(d) SPAZM - EURO4M

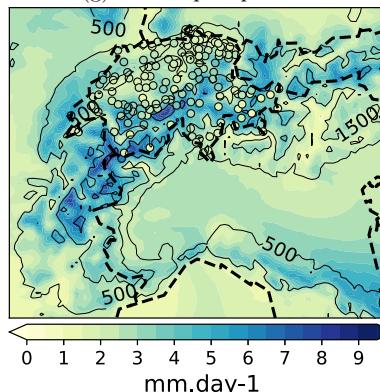

(e) Winter precip, Switzerland

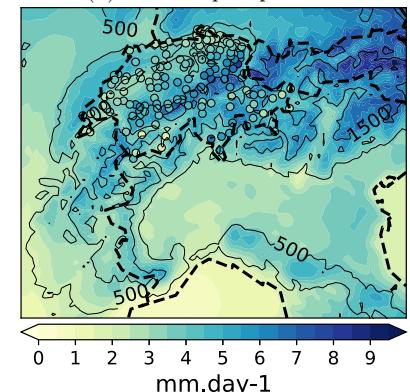

(d) Summer precip, Switzerland

(g) Winter precipitation

(h) Summer precipitation

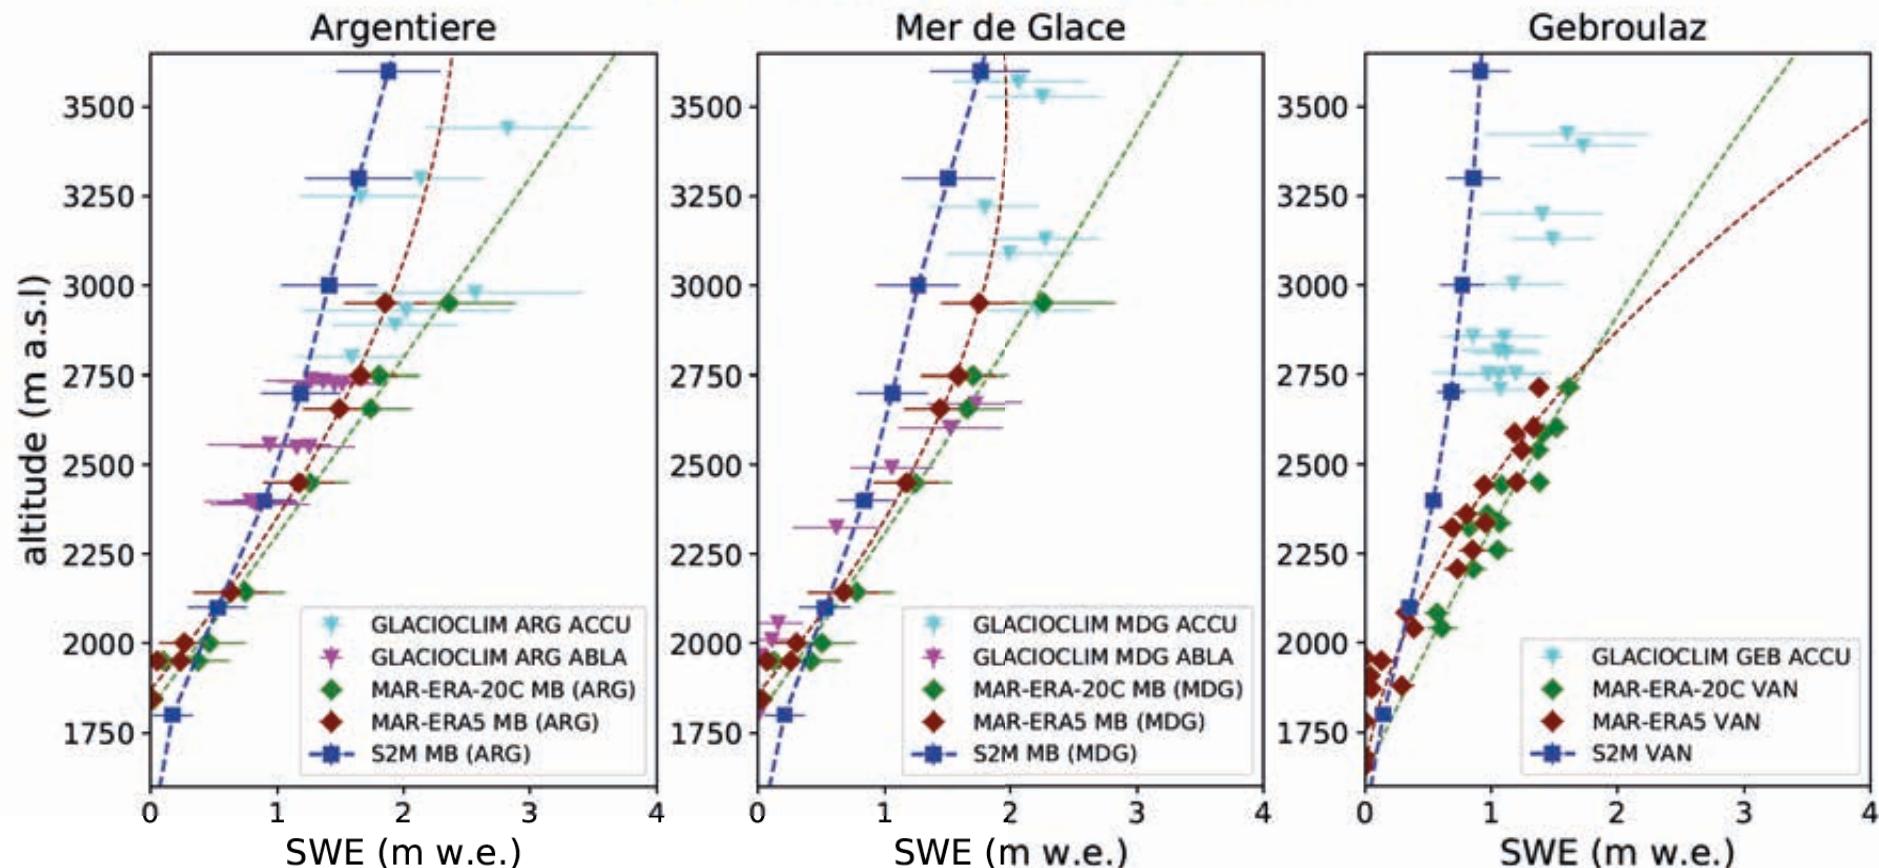

Annual mean of precipitation (a, mm) over 1971-2008: MAR and differences (%) with observational datasets

Precipitation over 1971-2008: vertical gradient (top) and seasonal mean (MAR and Swiss stations)

Snow accumulation

Late Spring SWE (1993-2010)

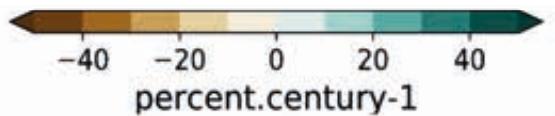

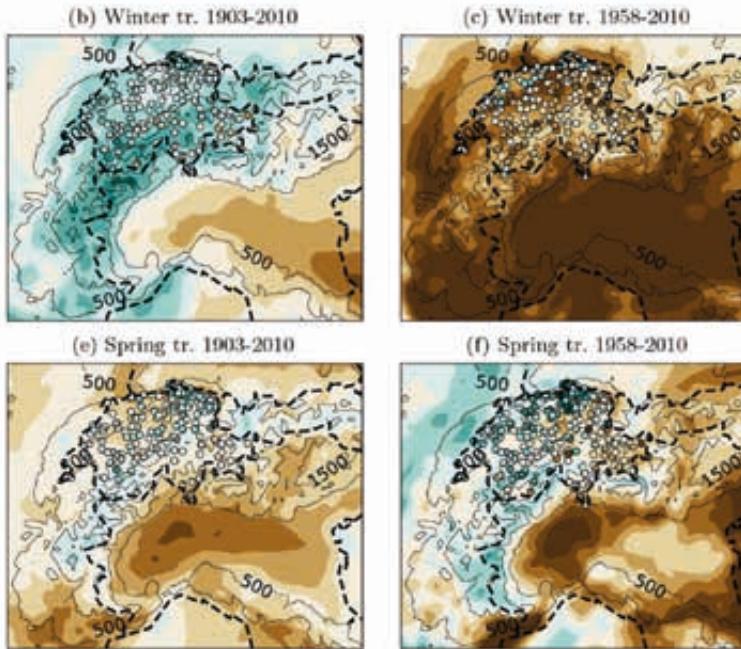

Late spring mean snow accumulation over 1993-2010 Glacioclim, S2M and MAR

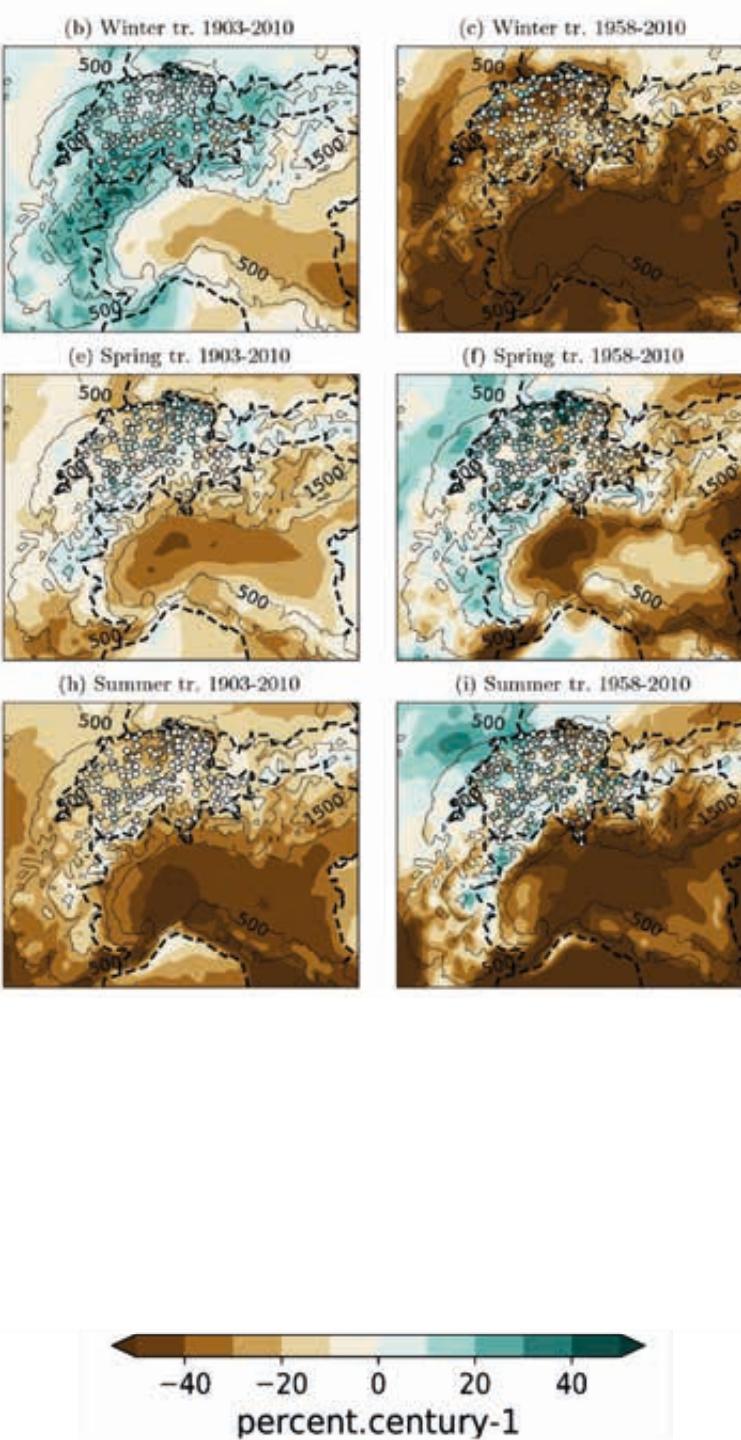

Seasonal trends of mean precipitation

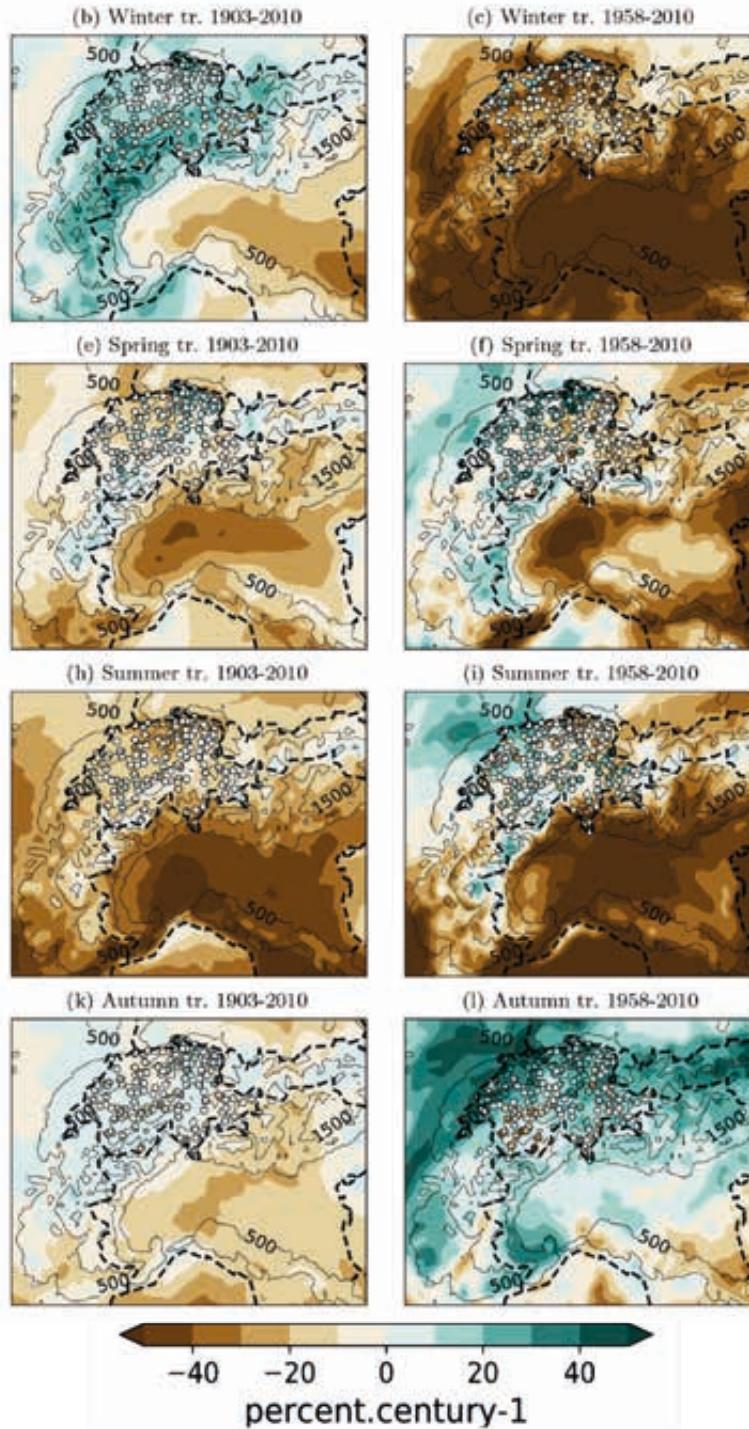

Seasonal trends of mean precipitation

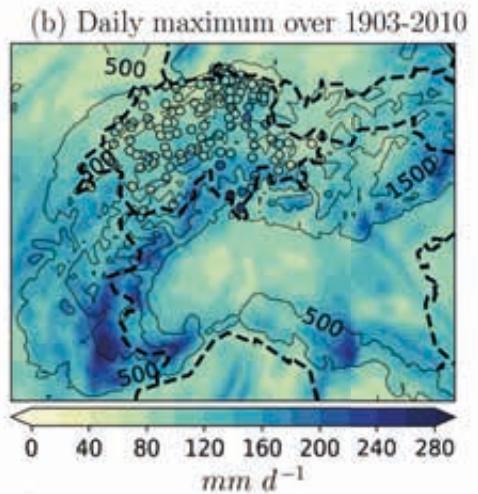

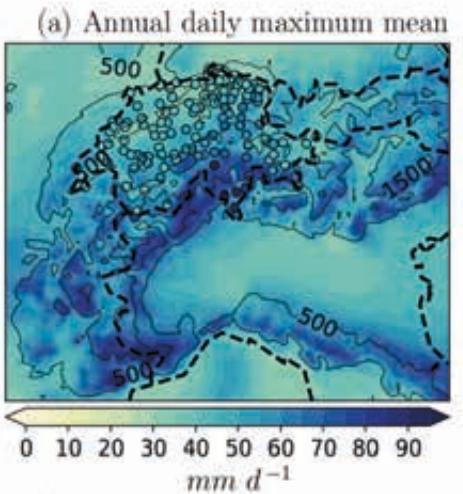

Seasonal trends of mean precipitation

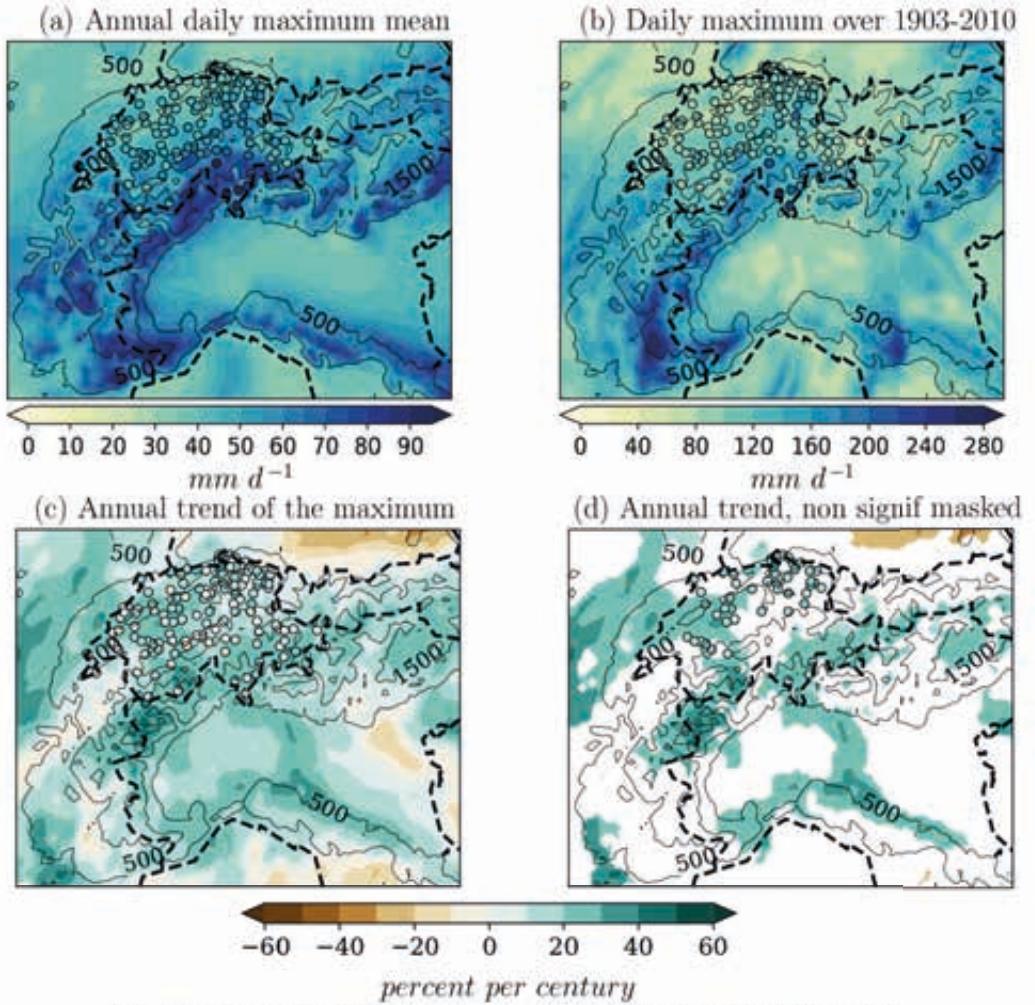

Seasonal trends of mean precipitation

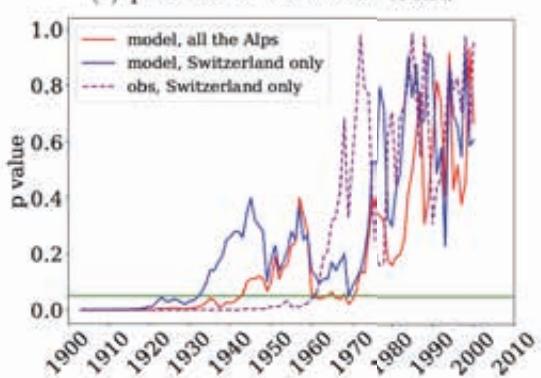

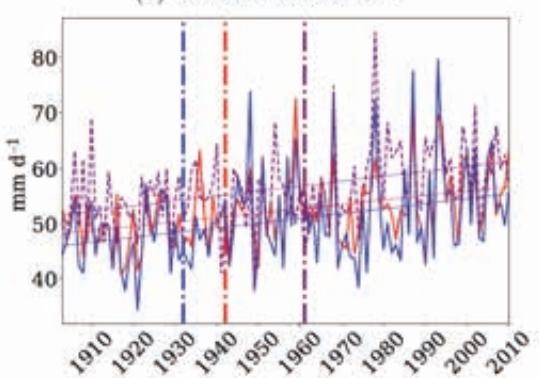

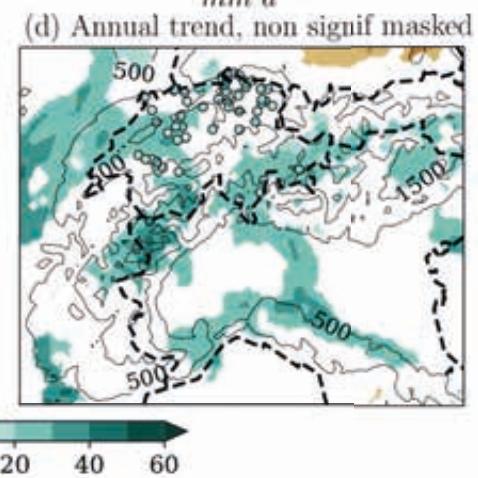

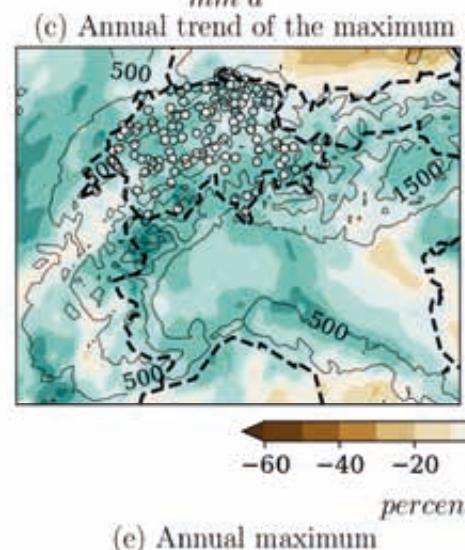

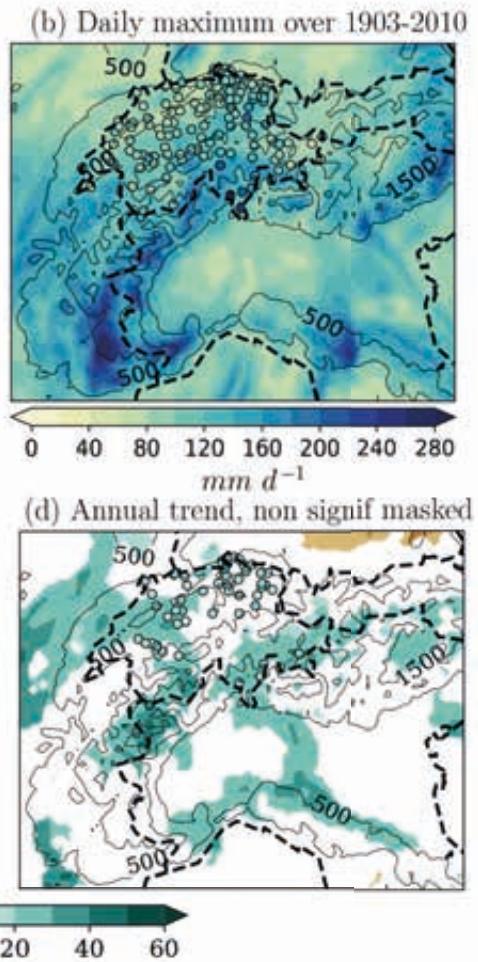

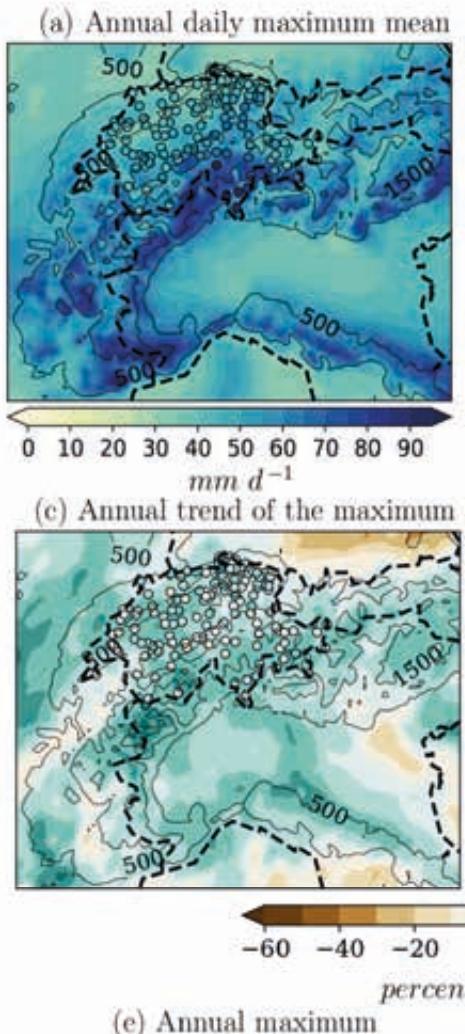

Annual trend of intense precipitation (Rx1day)

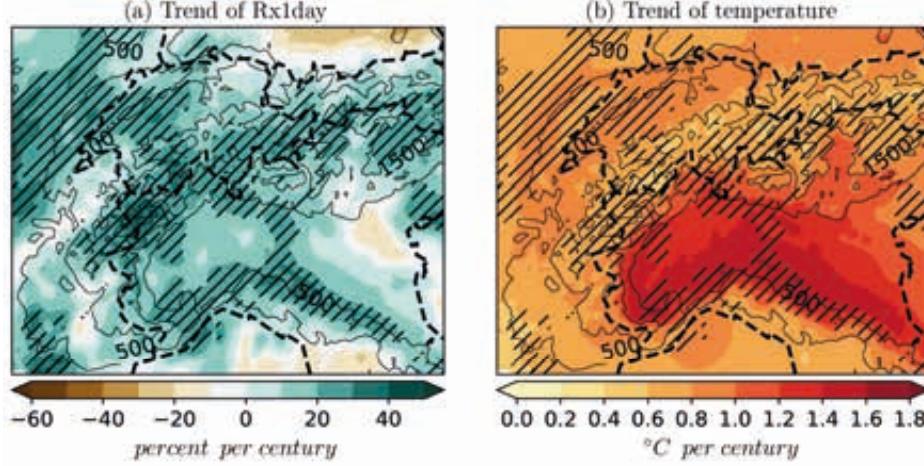

Annual trend of intense precipitation (Rx1day)

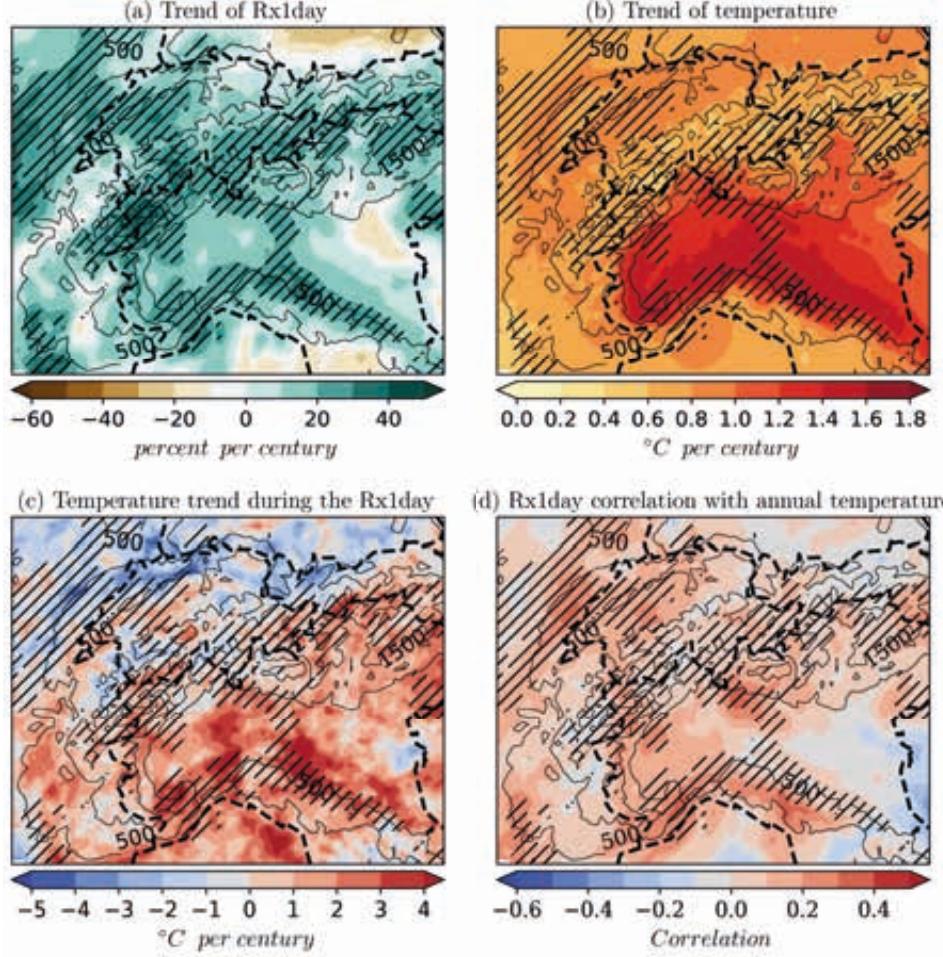

Annual trend of intense precipitation (Rx1day)

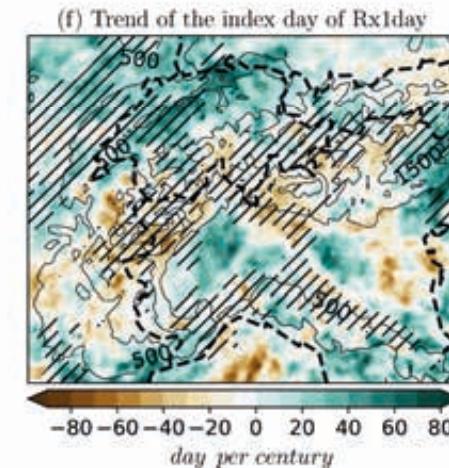

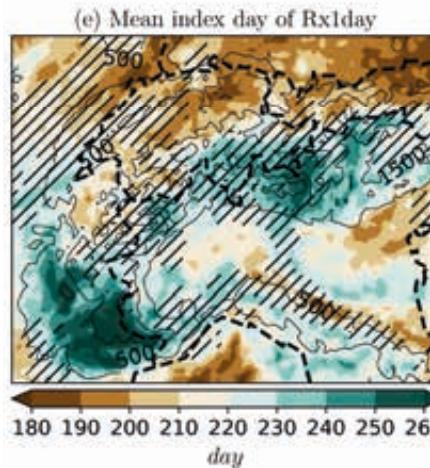

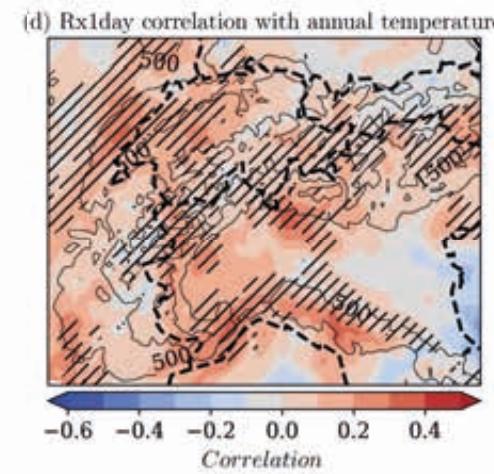

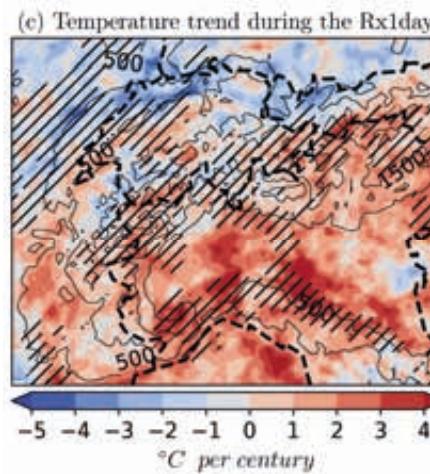

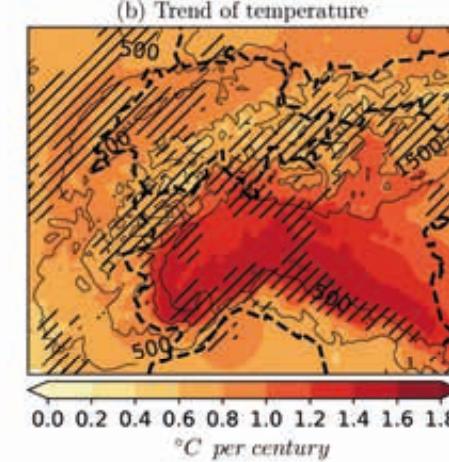

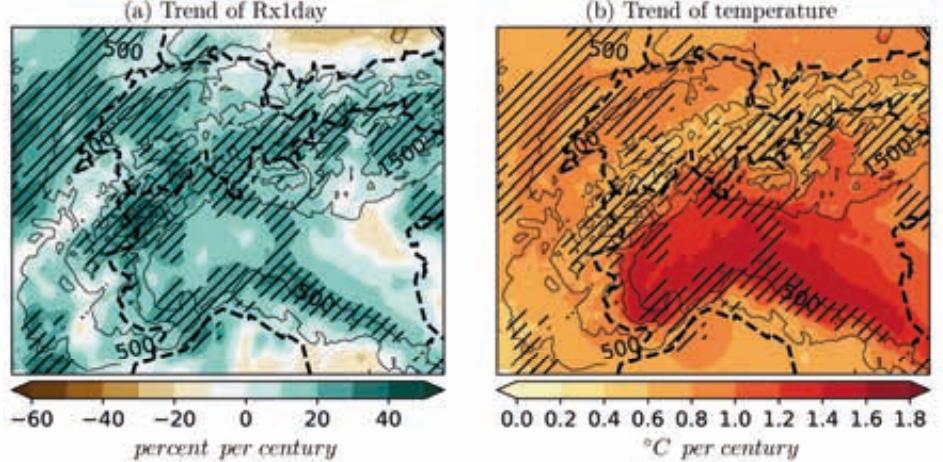

Rx1day trend versus temperature trend

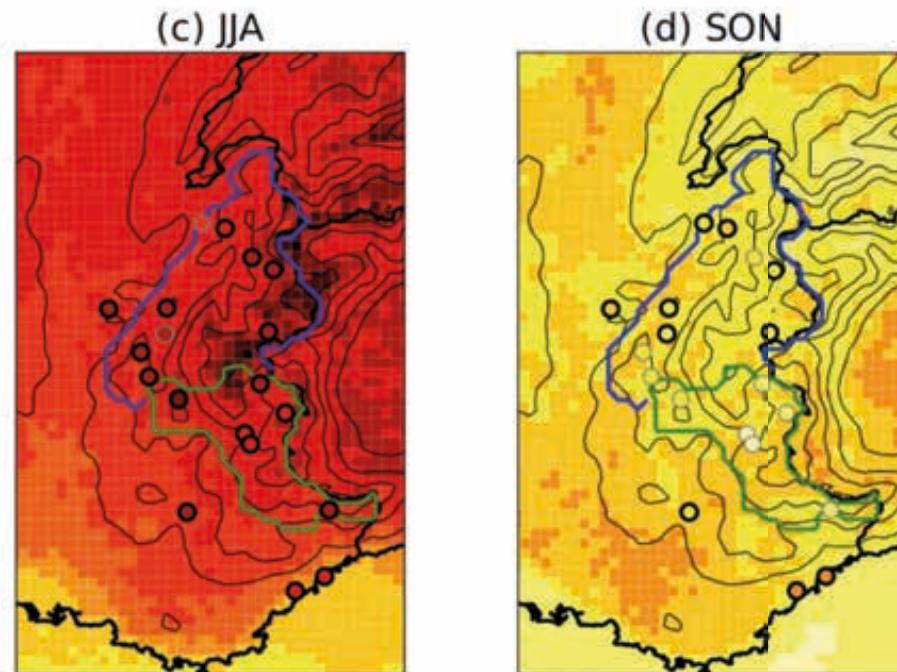

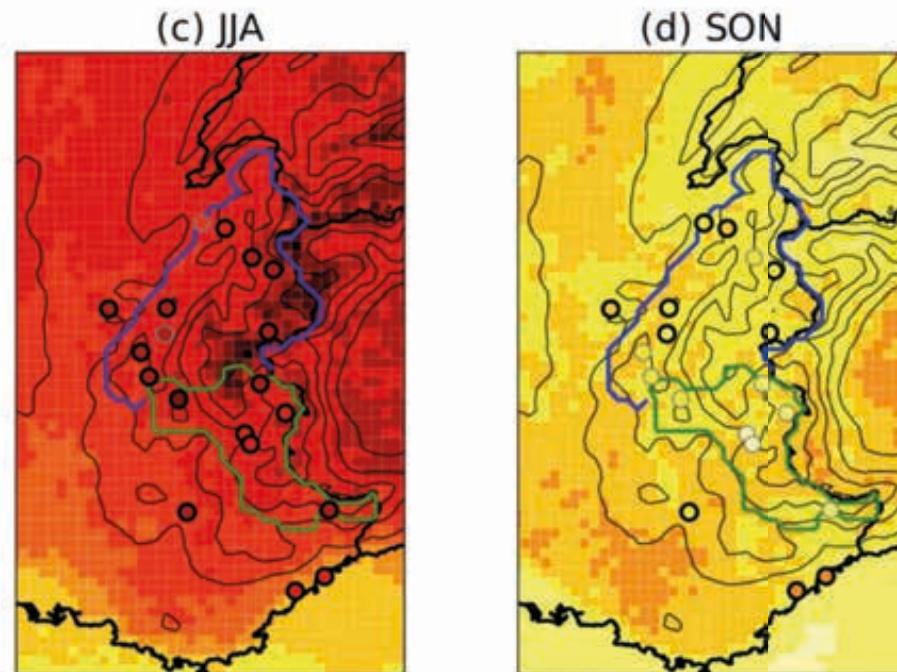

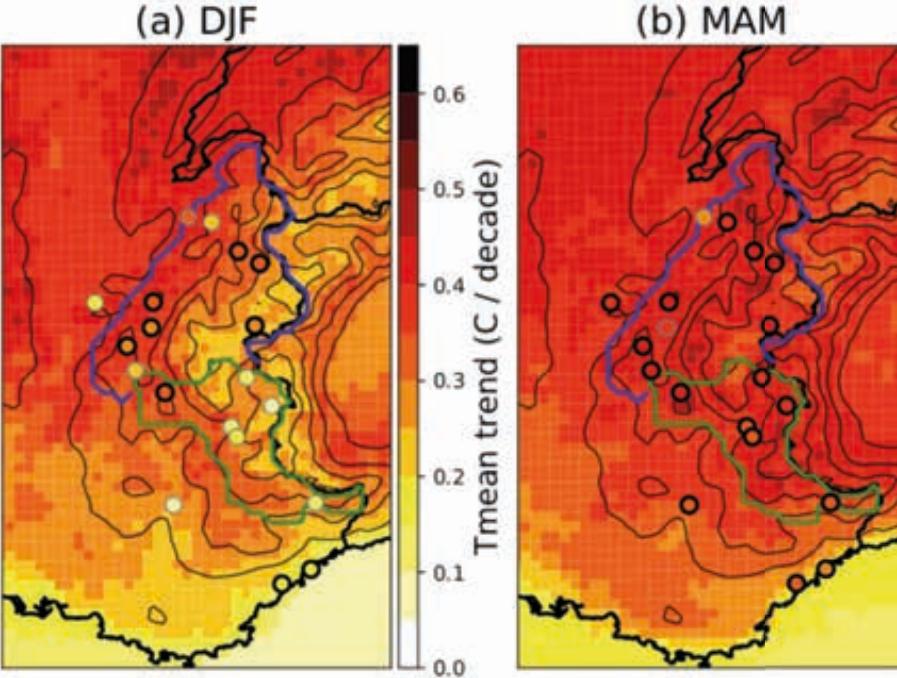

Rx1day trend versus temperature trend

Rx1day trend versus temperature trend

Temperature trend 1959-2010
MAR (shading) and Météo-
France stations (dots)

Temperature trend

MAR:

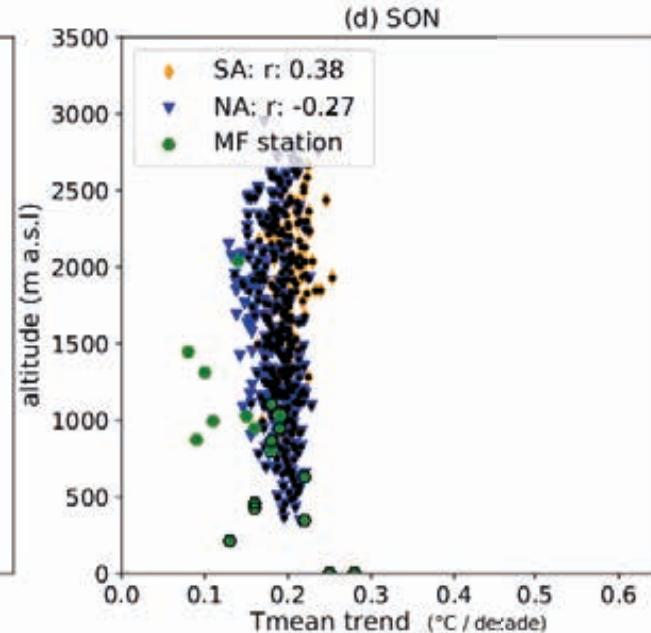

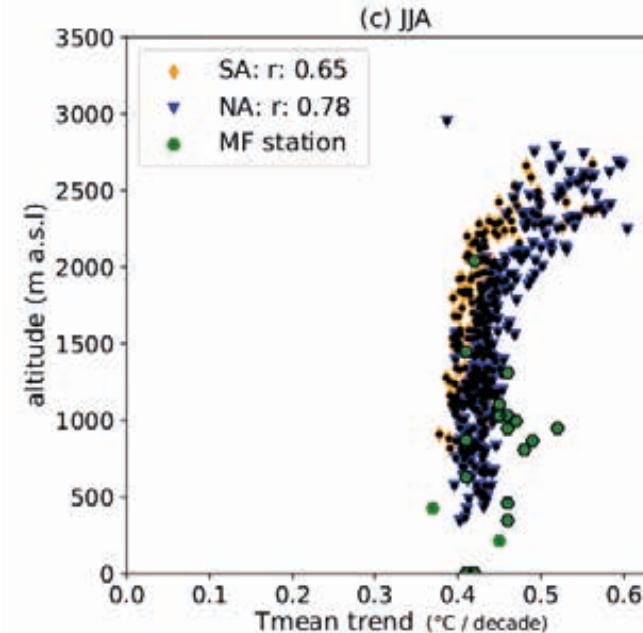

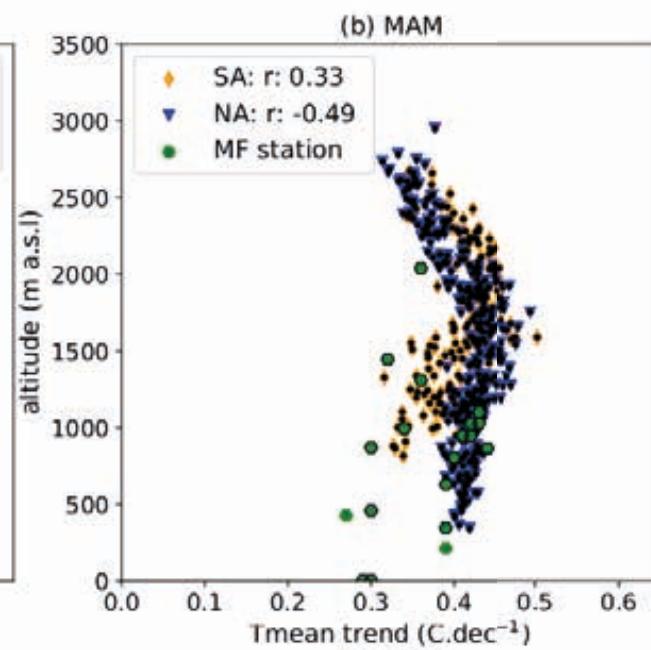

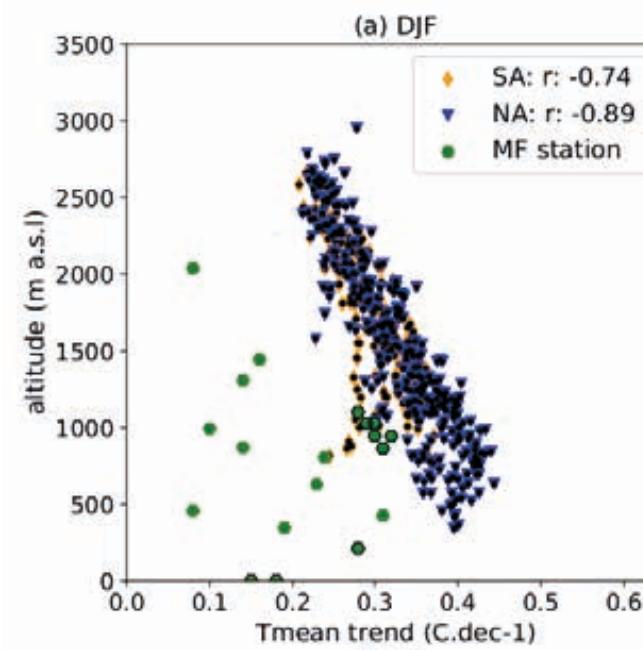

Southern Alps -> orange

Northern Alps -> blue

Meteo-France:

Stations -> green

a) MAR-ERA-20C Tmean trend 1959-2010

Take-home messages:

- ✓ Downscaling ECMWF reanalysis with MAR at 7km
- ✓ Accurate representation of precipitation in mountainous areas
- ✓ Estimation of the vertical gradient of precipitation
- ✓ Contrasted seasonal trends of mean precipitation; drastic drying in the Southern plains (20% to 40% per century)
- ✓ General increase in intense precipitation (up to 40% per century for the Rx1day)
- ✓ Positive trend in Rx1day where it is correlated with annual temperature
- ✓ Contrasted Temperature trends:
 - > summer 0.4 to 0.5°C/decade, more intense at high elevation
 - > spring and winter: 0.3°C to 0.4°C/decade, more intense at intermediate altitude, depending on the snow albedo feedback
 - > less pronounced in autumn (0.2°C/decade)
